April 19, 2013

Public Service Announcement

The Burlington Water Division will begin their annual hydrant flushing on April 22nd 2013. Flushing will begin on the low service with the Burlington Waterfront, moving through the New North End, Old North End and then the South End of town. We will finish with the high service which includes the Hill section and everything east of South Willard Street. We expect the entire process to take two months and will continue until each hydrant has been exercised.

Residents may experience discolored water due to the naturally occurring minerals and sediments that accumulate in the water mains and are disturbed via the flushing process. If this should happen, please let the cold water run for several minutes and this will help clear your water. Please note, we do not recommend laundering light colored clothing if your water is discolored.

If you should have any questions or concerns about this process, please contact Customer Service at 863-4501 or 863-9094. Additional information including the daily flushing schedule and a detailed map can be found at www.burlingtonvt.gov/dpw.
